PROFESSIONAL SUMMARY

Results-driven Full Stack Software Engineer and certified multi-cloud professional with over 4 years of experience in building scalable web applications. Specialized in Java, Spring Boot, React, SQL/NoSQL, microservices, AWS/GCP and DevOps. Seeking an opportunity to leverage my skills to drive organizational growth and success.

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript

Web Technologies: Spring Boot, Node.js (Express), React, RESTful APIs, Microservices, Kafka, JUnit, Maven

Databases and Caching: MySQL, PostgreSQL, MongoDB, Redis

Cloud and DevOps: AWS, GCP, IBM Cloud, Docker, Kubernetes, Jenkins, Terraform, Git

Others: OOP, Design Patterns, System Design, Data Structures, Algorithms, CI/CD, Agile, Scrum, TDD

WORK EXPERIENCE

Member of Technical Staff, Athenahealth, Chennai

June 2024 – Present

- Designed and implemented a unified Spring Boot library to standardize claim actions across 5+ third-party payer APIs, reducing integration complexity and accelerating backend development.
- Developed a React micro frontend and a cloud-native microservice (Spring Boot, PostgreSQL) to streamline claim appeal submissions, eliminating external payer portal dependency and reducing operational costs by 40%.
- Architected and deployed a Claim Adjust Engine leveraging ML predictions to identify non-recoverable claims and auto-generate adjustment notes, improving resolution for over 2% of daily denials.
- Engineered a dynamic claim note generator using claim metadata and agent inputs, reducing manual effort by 80% in generating personalized claim notes.

Senior Software Engineer, Ernst and Young GDS, Chennai

Aug 2021 – June 2024

- Built a scalable food ordering system with 6 Spring Boot microservices using MySQL, Kafka, and Spring State Machine, with JWT-secured RESTful APIs and event-driven async communication for real-time orchestration.
- Automated CI/CD pipelines using Jenkins and deployed the microservices on AWS ECS using rolling updates, enabling seamless deployments with zero-downtime releases and maintaining 99.9% uptime.
- Created a Node.js service with MySQL and a React dashboard with interactive charts and filters to calculate CO2e emissions from 1,000+ assets, enhancing ESG reporting and executive decision-making.
- Deployed 10+ IBM product solutions into OpenShift and IBM Cloud VMs as part of the EY-IBM collaboration, translating client requirements into scalable, consistent, and efficient deployment solutions.

EDUCATION

Anna University - St. Joseph's College of Engineering, Chennai

Aug 2017 – Apr 2021

B.E., Computer Science and Engineering | CGPA: 8.72

CERTIFICATIONS AND ACHIEVEMENTS

- AWS Certified Solutions Architect – Associate (Amazon Web Services)
- Google Cloud Certified – Associate Cloud Engineer (Google Cloud Platform)
- IBM Certified Professional Architect – Cloud v5 (IBM Cloud)
- EY Cloud Silver Badge – Recognized for excellence in cloud technologies
- Star Performer, Cognizant Student Club – Honored for leadership and technical contributions
- Winner, Smart India Hackathon 2019 – Secured 1st place for solving Yamaha's real-world challenge
- Winner, Code Challenge (Intra-Department Symposium 2019) - Secured 1st place in competitive coding event
